The fiscal year report presents statistics on convicted adult felons confined in the Institutional Division of the Texas Department of Criminal Justice from September of 1989 through August of 1990. The report is a record of inmate demographics, an archive document for research, and a source for public information.

0.0 The Summary section presents historical trends and fiscal year highlights.

1.0 The On-Hand section provides data on 49,157 inmates present on the last day of the fiscal year.

2.0 The Receives section focuses on the combined number of inmates in three receive groups - New Receives, Parole Violators, and Mandatory Supervision Violators. Receives exclude 933 Shock Probation Violators because of their large percentage of unavailable computer data. The total number of receives this fiscal year was 46,290. Statistics are shown for 45,357 receives.

3.0 The Releases section addresses the combined number of inmates in three release groups - Parole, Mandatory Supervision, and Shock Probation. Discharge releases were excluded because of their small number: 120 inmates. Releases totaled 38,041 inmates; statistics are shown on 37,921.

4.0 The New Receives section presents the 28,648 inmates received with new convictions.

5.0 The Parole Violators section targets 14,086 inmates received for violating parole conditions.

6.0 The Mandatory Supervision Violators section provides data on 2,623 inmates received for violating mandatory supervision release conditions.

7.0 The Parole section presents the 33,181 inmates released to the supervision of the Pardons and Paroles Division (PPD). Eligibility generally requires prison time plus good conduct time to equal either one-third or one-fourth of the sentence, depending on the nature of the offense.

8.0 The Mandatory Supervision section focuses on the 3,856 inmates released to PPD supervision. Eligibility generally requires prison time plus good time to equal the total sentence.

9.0 The Shock Probation section presents statistics on 884 inmates released to Community Justice Assistance Division supervision during the fiscal year. The prison records of eligible candidates who have served up to six months are reviewed by the court to determine if release on probation is appropriate.

Descriptive data are presented for male, female, and total inmates by fifteen basic variables: number of inmates by month; principal racial groups; age groups; place of conviction in Metropolitan Statistical Area (MSA); offense resulting in longest sentence; aggravated and non-aggravated offenses; IQ score; educational score; highest self-reported school grade completed outside prison; prior number of confinements in prison (Texas and other); prior probations; good conduct time categories; security custody levels; and sentence length.

The total number of inmates On-Hand the last day of the fiscal year increased by 18% compared to last year. Receives increased by 39% and Releases increased by 23%.

New Receives comprised 62% of all inmates received this fiscal year. Parole Violators represented 30%; Mandatory Supervision Violators made-up six percent, and Shock Probation Violators were two percent of all receives. The total number of inmates received this year represented a rate of 267 inmates for every 100,000 Texans. The 28 MSA's presented a prison receive rate of 277 inmates per 100,000.

The Crime Index rate for the top five Texas MSA's was 9,610 per 100,000; the prison receive rate was 311 per 100,000. In the top five MSA's, San Antonio had the second highest Crime Index rate (10,599) and the lowest prison receive rate (148); Dallas had the highest Crime Index rate (10,936) and the second highest receive rate (366); and Houston had the lowest crime rate (8,470) and the highest receive rate (373).

Discharge releases represented less than half of one percent of the total number of releases this year. Parole releases accounted for 87%, Mandatory Supervision was 10%, and Shock Probation comprised two percent of all inmates released. The average time served by released inmates was about 23 months. The average sentence length for releases was 9.4 years. Inmate releases served an average of 20% of the sentence. Parole releases served 1.8 years on an average sentence of 9.7 years or 19% of the sentence. Mandatory Supervision releases served 2.9 years on 7.3 years or 40% of the sentence.

This year, female inmates represented between four and five percent of the On-Hand population. Receives and Releases were each represented by a proportion of eight percent female. The average age of On-Hand inmates was 32 years. For Receives, the average age was 30 years, and for Releases, 30 years.

Inmates with convictions for Violent Offenses accounted for 45% of the On-Hand population, 21% of all Receives and 21% of all Releases. Property Offenses were represented by 32% of the On-Hand, 47% of Receives , and 48% of Releases. Inmates with sentences for Drug Offenses were distributed by 19% On-Hand, 26% Receives, and 25% Releases.

Prior Texas prison confinement was represented by 51% of the On-Hand, 17% of the Receives, and 38% of the Releases this fiscal year. The average sentence length for inmates On-Hand was 23.1 years.

Of On-Hand inmates, 69% had at least one prior probation, 54% of all Receives fell in that category, and 72% of this year's Releases had prior probations.

Aggravated Offenders (inmates with convictions where the court found that weapons were used or violence occurred during the crime) accounted for 29% of On-Hand inmates, 8% of Receives, and 6% of Releases this fiscal year.

Most of the On-Hand inmates were trusties (83%) and most were classified in Minimum Custody (75%). About 16% were classified in one of three custody categories - Administrative Segregation (5%), Close Custody (6%), and Medium Custody (5%).

Approximately 39% of the On-Hand population had educational achievement (EA) scores in the sixth through ninth grade levels and 32% had less than sixth grade level scores. Thirteen percent presented scores at the tenth grade level and above. Sixteen percent had no EA score, including inmates not tested and inmates who were administered the Adult Basic Learning Examination (ABLE Test).

Most On-hand inmates had IQ scores in the 80 to 89 range (23%); seven percent had scores of 69 or less; about 27% had IQ scores of 100 or higher.

Approximately 42% of all On-Hand inmates claimed to have completed the ninth through the eleventh grades. Less than three percent claimed college attendance; 22% claimed to have dropped out of school before reaching the ninth grade. Only 16% claimed to have completed high school and 12% claimed a GED or a high school equivalent diploma.
